

RC 3 - 5.7A

Fossil fuels

RC 3 - 5.7A

Natural gas

RC 3 - 5.7A

substances formed when buried layers of organic are chemically changed by pressure, bacterial processes and heat. These fuels are used to produce heat and power.

RC 3 - 5.7A

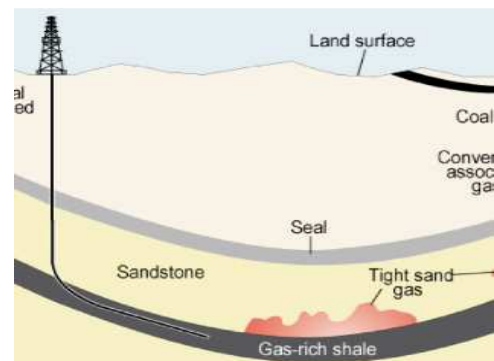

a gas used as a fuel that was produced from organic matter buried in sedimentary rock for millions of years.

RC 3 - 5.7A

RC 3 - 5.7A

Oil

RC 3 - 5.7A

Organic matter

RC 3 - 5.7A

a liquid used as fuel that was produced from organic matter buried in sedimentary rock for millions of years.

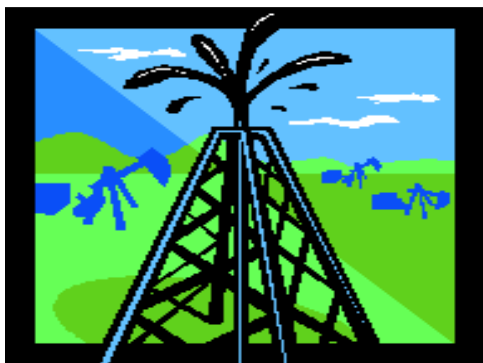

RC 3 - 5.7A

remains of dead organisms both plant and animal

RC 3 - 5.7A

RC 3 - 5.7A

RC 3 - 5.7A

Pressure

RC 3 - 5.7A

Sediment

RC 3 - 5.7A

the force of pressing down
from the weight of material
above

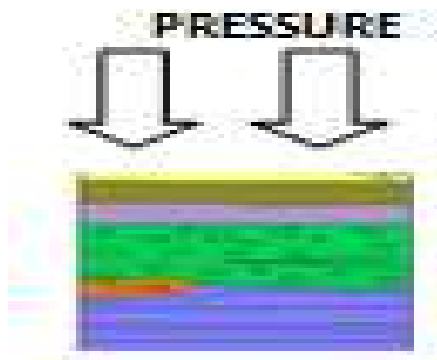

RC 3 - 5.7A

small pieces of mineral or
organic matter deposited by
Water, air or ice.

RC 3 - 5.7A

RC 3 - 5.7A

RC 3 - 5.7A

Sedimentary rock

RC 3 - 5.7A

RC 3 - 5.7A

rocks made of layers of compressed organic and inorganic sediments.
